

Causality and Data

Assistant Professor, Department of Political Science,
Yale University

Fredrik Sävje

Abstract:

One of the core enterprises of the social sciences is causality. Scholars ask not only how things are, but also *why* they are that way. Researchers and policy makers ask how one can intervene on the world to change it; thus, they inquire about the effects of their actions. This talk will focus on how quantitative information (“data”) can help us answer these questions.

Date: Tuesday, May 22nd 17:00-19:00

Place: Seminar Room, 2nd Floor, Building 101,
Komaba Campus, The University of Tokyo

Language: English

Free Admission/ No Registration Required
